

SASE: A new approach to network and security for today's modern business

The way that businesses operate is changing

Renewed focus on digital transformation

80% of businesses plan to accelerate their digital transformation efforts¹

Users are working from everywhere

48% of employees will work remotely at least some of the time after the pandemic²

Applications are moving to the cloud

87% of enterprises are adopting a hybrid cloud strategy³

Managing networking and security is complex and disjointed

Point products resolve narrowly defined challenges, while leaving gaps in network performance, security, or both.

<p>Inconsistent or sluggish access to applications</p> 	<p>Different security policies for onsite and remote users</p> 	<p>Excessive overhead to deploy and manage</p> 
--	--	--

It's time for a new, more modern approach to connectivity and protection

Secure Access Service Edge (SASE) is a unified network and security architecture that enables consistent security policies and user experiences with simplified management.

Supports today's critical use cases

-  • Multi-cloud migration
-  • Highly secure branches and SD-WAN deployments
-  • Enabling and protecting remote and hybrid workforces
-  • And more...thanks to its adaptable architecture

AT&T SASE with Palo Alto Networks offers a comprehensive, integrated architecture that's as modern as your vision

AT&T Managed Services

AT&T SD-WAN with Palo Alto Networks

Utilizes machine learning and automation to improve network performance and resiliency

AT&T Secure Remote Access powered by Palo Alto Networks

Highly secure, identity-based access to applications from virtually anywhere

AT&T Secure Web Gateway powered by Palo Alto Networks

Cloud-delivered unified protection across locations, users, and devices

All offered as a managed service including deployment, policy design and configuration, 24x7 monitoring and help desk support, and maintenance

What can this mean to your organization?

- | | |
|--|--|
| <ul style="list-style-type: none">  • Better application performance  • Improved network resiliency  • Reduced risk of security breach | <ul style="list-style-type: none">  • Less management complexity  • Scalability for the future  • Potential cost savings |
|--|--|

Together, AT&T Business and Palo Alto Networks help improve business outcomes by preparing organizations for whatever comes next.
