

ALIENVAULT FAST FACTS

About AlienVault

Security management can be a complex, time-consuming, and expensive undertaking for all organizations, and can become especially chaotic for those with limited security resources, time, and budget. But it doesn't have to be this way. We founded AlienVault® to help organizations of all sizes achieve the same threat detection capabilities as Fortune 500 companies, for their full IT infrastructure, without the headaches and hassles of deploying, integrating, and managing multiple products. We believe that true solutions don't add to the complexity, but rather provide insight into how to make sense of it.

AlienVault's award-winning products are designed and priced to ensure that all organizations have access to world-class security. By integrating essential security capabilities into a Unified Security Management® (USM) platform, and then powering that platform with up-to-the-minute threat intelligence from AlienVault Labs and our Open Threat Exchange® (OTX™) – the world's largest crowd-sourced collaborative threat exchange – AlienVault provides its more than 7,000 commercial customers with a unified, simple and affordable solution that simplifies and centralizes threat detection, incident response, and compliance management for cloud and on-premises environments.

Founded in 2007, the company now employs over 300 people worldwide. Headquartered in San Mateo, CA, AlienVault also has offices in Austin, TX; Madrid, Spain; Granada, Spain; and Cork, Ireland. The company's seasoned management team is led by President and CEO, Barmak Meftah, an experienced leader in the security software industry.

AlienVault is a privately held company backed by Trident Capital, Kleiner Perkins Caufield & Byers, GGV Capital, Intel Capital, Jackson Square Ventures, Adara Venture Partners, Top Tier Capital, Institutional Venture Partners and Correlation Ventures.

Executive Team

Kenneth Goldman, Former CFO, Yahoo!

John M. Jack, Board Partner, Andreessen Horowitz

Alberto Gomez, Managing Partner, Adara

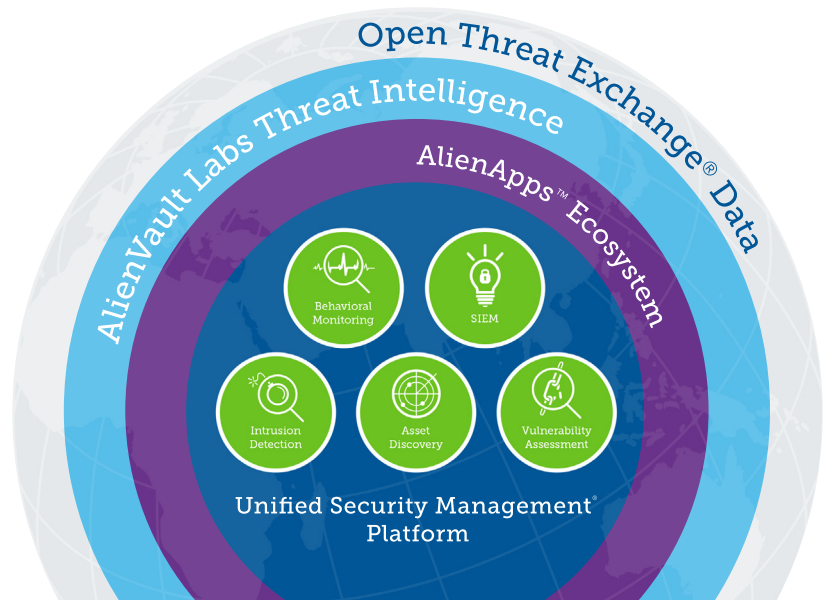

Barmak Meftah, President & CEO, AlienVault

Award Winning Products

Our range of products — [AlienVault® USM Anywhere™](#) and [USM Central™](#) platforms for monitoring cloud and on-premises environments, [AlienVault Open Threat Exchange®](#), and our open source SIEM, [AlienVault OSSIM](#), enable IT teams with limited resources to accelerate and simplify their threat detection and response, and go from installation to first insight in minutes. We solve the challenges so many organizations face: a lack of security expertise, too many point solutions that don't work together, and the isolation that comes from relying only on the closed threat intelligence provided by security point products.

We continually update the AlienVault USM platform with threat data collected from our Open Threat Exchange, which has more than 80,000 participants who contribute over 19 million threat indicators to the exchange daily. In addition, we continually and automatically update our USM platform with AlienVault Labs Threat Intelligence for targeted detection and actionable guidance to effectively respond to the latest threats.

What Our Customers Have to Say

“With USM Anywhere, I can monitor both my cloud environment and my local environment together, and I no longer have to use my own hardware for number crunching and analysis – that’s all handled by the USM Anywhere cloud system. This product brings together everything I need under one roof and the enhanced reporting and dashboard make things much easier to manage for small teams—in this case a team of one. In my experience, AlienVault is the only company that makes this possible.”

- Jason Weitzman, Colony Starwood

“Our security view today looks very different than before [AlienVault] USM. Proactive alerting is huge for us. If there were a potential incident or something that raised our eyebrows, oftentimes, we would be discovering that 12 or 24 hours after it occurred, and now we know within minutes.”

- Jason Harper, CEO & Founder, Celopay

“I didn’t fully realize how much value I would get out of [AlienVault] USM until I started using it.”

- Matthew J. Frederickson, CISSP, Director of Information Technology, Council Rock

“As the ‘lone security ranger,’ there are a lot of things that keep me up at night – namely credit card data breaches and malware. I’m glad I have AlienVault USM to provide the ability to detect malware and help us stay PCI compliant.”

- Kevin Geil, Information Security Officer, NYORDA

Timeline

2017

- AlienVault Becomes Available on AWS Marketplace
- AlienVault USM Anywhere Achieves AWS Security Competency
- Named to Forbes 2017 Cloud 100 List of the world's best cloud companies for 2nd Consecutive Year
- Named to Deloitte's Fast 500 list of the fastest growing technology companies in North America for the 6th consecutive year
- Awarded 5-Stars and Lab Approved Rating by SC Mag for 2nd consecutive year
- Introduces first AlienApps for USM Anywhere to extend threat detection to Microsoft Office 365, G Suite, Palo Alto Networks, Cisco Umbrella and others
- Announces Global Distribution Relationship with Ingram Micro
- Achieves AWS Advanced Technology Partner Status
- USM Anywhere released bringing threat detection and response to cloud, hybrid and on-premises environments
- Announces 5th Consecutive Year of Hypergrowth with more than 53% year-over-year sales growth

2015

- Named to Forbes' list of the hottest cybersecurity startups of 2015
